

Insect Addition

Add the insects and write the answer on the line.

Three black ants are shown in a row. The first two are followed by a plus sign, and the third is followed by an equals sign and a blank line for the answer.

$$3 \text{ ants} + 1 \text{ ant} = \underline{\hspace{2cm}}$$

Four yellow and black bees are shown in a row. The first three are followed by a plus sign, and the fourth is followed by an equals sign and a blank line for the answer.

$$3 \text{ bees} + 1 \text{ bee} = \underline{\hspace{2cm}}$$

Four brown butterflies are shown in a row. The first two are followed by a plus sign, and the next two are followed by an equals sign and a blank line for the answer.

$$2 \text{ butterflies} + 2 \text{ butterflies} = \underline{\hspace{2cm}}$$

Five blue beetles are shown in a row. The first one is followed by a plus sign, and the next four are followed by an equals sign and a blank line for the answer.

$$1 \text{ beetle} + 4 \text{ beetles} = \underline{\hspace{2cm}}$$

Five grey spiders are shown in a row. The first three are followed by a plus sign, and the next two are followed by an equals sign and a blank line for the answer.

$$3 \text{ spiders} + 2 \text{ spiders} = \underline{\hspace{2cm}}$$

Six green caterpillars with orange spots are shown in a row. The first three are followed by a plus sign, and the next three are followed by an equals sign and a blank line for the answer.

$$3 \text{ caterpillars} + 3 \text{ caterpillars} = \underline{\hspace{2cm}}$$

Insect Addition

Add the insects and write the answer on the line.

$$+ \quad = \underline{3}$$

$$+ \quad = \underline{4}$$

$$+ \quad = \underline{4}$$

$$+ \quad = \underline{5}$$

$$+ \quad = \underline{5}$$

$$+ \quad = \underline{6}$$
